Pinch Valves*

SERIES - EN

ENCLOSED BODY PINCH VALVE

RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

APPLICATIONS

- Highly Abrasive /Corrosive Mineral Slurries
- Powders or Granular substances
- Power Stations
- Waste and Water Treatment
- Chemicals and Cement
- Pulp and Paper
- Pneumatic Conveying

OPTIONAL EXTRAS

- Dust Covers : PVC Bellows and Spindle cover.
- Instrumentation : Proximity Switches - Pneumatic Solenoid Valves.
- Stroke Adjustor for control applications

FEATURES

- Fully Cast Ductile Iron body and bonnet.
- Dual pinch mechanism
- Bubble-Tight shut-off even on trapped solids
- 100% Full bore full flow or reduced /conical bore for control applications.
- No Packing, less maintenance
- Fast and Easy field replaceable sleeve
- On-Off or Control applications

ACTUATORS

- Handwheel/bevel gear box
- Pneumatic Double Acting/Fail safe
- Electric Actuators/Fail safe
- Hydraulic Actuators/Fail safe

The RHINOFLEX EN-Series is a compact, rugged and robust Pinch Valve. These valves are reliable and maintenance free and are engineered and designed for highly abrasive and aggressive slurry applications. The series has a simple yet trustworthy design, consisting of two pinch bars that open and close the Elastomer sleeve.

The field replaceable sleeve is the only wetted part which is reinforced and fabricated using high quality elastomer materials, and provides for smooth operation with no clogging, jamming, etc., and can even close tight on solids. EN-series pinch valve is bidirectional and full bore. In the open position the valve will be as part of the pipe line, but when closed the simple standard mechanical operation using double pinch bar mechanism to compress the elastomer sleeve from top and bottom closing simultaneously at the centre to provide a bubble tight shutoff.

The RHINOFLEX 'Series-EN' Pinch Valve are fully flanged and can be drilled to suit all standard drilling patterns (ANSI, BS, TABLE D/E etc). With instrumentation, this valve can be used as a control valve and is available in a wide range of sleeve elastomer options.

SERIES - RX

MANUAL PINCH VALVE

RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

The Series- RX Manual Pinch Valve, is one of the oldest designs and most widely used pinch valves across the world today. It has a Full port design, which eliminates all dead spots, clogging, or crevices where slurry can potentially compact and impair the flow.

The heart of this valve is the Rhinoflex high performance rubber sleeve and is the only wetted part. It also has the standard double pinch bars that provide a smooth reliable mechanical pinch operation.

The Series -RX pinch valve has excellent manual control characteristics and can be used for throttling control applications.

FEATURES

- Fully Enclosed body design
- Cost effective On Off or Control use
- Drip tight Bidirectional closure even on solids
- Dual pinching mechanism
- Reduced port or cone sleeves.
- Position indicator as standard
- 100% full port / minimum pressure drops
- Non-rising handwheel and stem
- Operating torques will remain constant over time.
- No scaling or build up
- Flanges tapped for ANSI# 125/150 / AS2129 TAB D/E/Etc
- Conforms to ANSI B16.10 Face to Face
- Interchangeable with Gate, Plug, and Ball Valves
- Can be installed in any position
- Positive opening tags standard

APPLICATIONS

- Highly Abrasive /Corrosive Mineral Slurries
- Powders or Granular substances
- Power Stations/FGD
- Lime control/Waste and Water Treatment
- Chemicals and Cement
- Food and Beverage
- General Industry

ACTUATORS

- Handwheel
- Bevel gear box
- Pneumatic Single/Double Acting/Fail safe
- Electric Actuators/Fail safe

OPTIONAL EXTRAS

- Conical sleeves for control applications
- Larger sizes and higher pressures
- Can be actuated with various options

SERIES - OF

OPEN FRAME PINCH VALVE

RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

APPLICATIONS

- Hard Rock Mining
- Coal
- Soda Ash
- Mineral Sand
- kaolin
- Phosphate
- Pulp & Paper
- Cement
- General Industrial
- General Chemical
- Power Utilities
- Sand & Gravel
- Alumina

OPTIONAL EXTRAS

- Dust Covers : PVC Bellows and Spindle cover.
- Instrumentation : Proximity Switches - Pneumatic Solenoid Valves.
- Stroke Adjustor for control applications

FEATURES

- Fully Cast Ductile Iron body in Carbon steel and stainless steels
- Dual pinch mechanism
- Bubble-Tight shut-off even on trapped solids
- 100% Full bore full flow or reduced /conical bore for control applications.
- No Packing, less maintenance
- Fast and East field replaceable sleeve

ACTUATORS

- Handwheel/bevel gear box
- Pneumatic Double Acting/Fail safe
- Electric Actuators
- Hydraulic Actuators

The RHINOFLEX 'Series-OF' pinch valve gives the end user the best of both worlds. It solves problem and demanding applications and offers the added features of a conventional Enclosed body pinch valve at a much better price. This pinch valve has the popular features of having a field replaceable sleeve, and can be fabricated to suit all non-standard Face to Face dimensions.

This RHINOFLEX 'Series-OF' pinch valve is Bi directional, full-flow, full bore, with no packing, glands, seats and seals, discs and shafts which could rust and malfunction. The pinch mechanism is extremely simple in design, with the centreline closing of two pinch bars, upon the rubber sleeve, which is the ONLY wetted part, and the heart of the valve.

The RHINOFLEX 'Series-OF' Pinch Valve are fully flanged and can be drilled to suit all standard drilling patterns (ANSI, BS, TABLE D/E etc).

SERIES - QT

QUARTER TURN PINCH VALVE

RHINO FLEX™

ASSEMBLED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

APPLICATIONS

- Highly Abrasive /Corrosive Mineral Slurries
- Powders or Granular substances
- Power Stations
- Lime control/Waste and Water Treatment
- Chemicals and Cement
- Food and Beverage
- General Industry

OPTIONAL EXTRAS

- Can be converted to Suit Flanges AS2129 Tab D/E etc
- Can be converted to threaded ends
- Positioners and instrumentation for control

FEATURES

- Fully Vinyl Ester moulded body
- Gear driven Cam-Dual pinch mechanism
- Bubble-Tight shut-off even on trapped solids
- 100% Full bore or reduced /conical bore for control applications.
- No Packing, less maintenance
- Fast and Easy field replaceable sleeve
- On-Off or Control applications
- Flange mounting to suit ASME B 16.5
- All standard elastomer sleeve options
- Easy to fit with standard Quarter turn Pneumatic actuator

ACTUATORS

- Hand-lever/ Quarter Turn bevel gear box
- Standard Pneumatic Single/Double Acting/Fail safe
- Electric Actuators/Fail safe

The Series-QT Quarter-Turn valve is a high flow capacity pinch valve. Designed for hard-to-handle fluids specially slurries. The valve interior consists of fabric reinforced elastomeric or PTFE lined Diaphragm Spool, the only wetted component of the valve. Two opposing gear driven cams, contain in a flanged split vinyl ester-fibreglass body, act on the Diaphragm Spool, providing flow control over the entire 90 degrees of valve stem travel. The valve exhibits negligible pressure drop in the open position and bubble-tight closure even around solids in the closed position. Where solids in the slurry make operation of the other types of valves, such as ball, plug and butterfly valves, extremely problematic, the Series-QT valve is ideally suited for slurries since there are no "dead zones" in the valve internals.

SERIES - PJ

AIR JACKETED PINCH VALVE

RHINO FLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

Rhinoflex Series-PJ, Air Jacketed pinch valves offers a simple, cost-effective design, perfect for handling extremely demanding abrasive materials. The valve's split body design allows quick and easy sleeve replacement, and is available in ductile iron, with flanged ends.

These valves are designed to operate on differential pressure. To operate the Rhinoflex PJ Pinch Valves, it takes about 25 psi (+/- 10 psi) of differential pressure to close the valve tight.

So as an example, if there is a flow of 15 psi running through the valve, expect to require a minimum of 40 psi on the control side to fully close the valve. The less the pressure, the greater the sleeve life.

APPLICATIONS

- Mineral Processing
- Power plants
- Bulk and solids handling
- Cement industry
- Waste water treatment
- Chemical industry
- Food and Beverage
- Ceramic-/Glass-/Plastic industry

OPTIONAL EXTRAS

- Double Wall sleeves / Reduced port sleeves
- Convert to threaded ends
- Optional solenoid control for remote use
- Optional booster relay for rough throttling

FEATURES

- Only one moving part
- Closes drop-tight on solids
- Body cavity acts as built-in actuator
- No cavities or dead spots to bind valve operation
- Full-port design/ Self-cleaning
- Long Cycle life
- No packing to replace or maintain
- Cost effective and maintenance free
- No extra or special actuator required
- Very fast opening/closing times
- Only one replaceable part (elastomer sleeve)
- Suitable for vacuum service

SERIES -XL

LARGE DIAMETER PINCH VALVES

RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

Rhinoflex Series-XL Large diameter pinch valves are offered in both Open Frame and Enclosed body models. These are available from 300mm/12- inch to 1000mm /40-inch nominal bore size range.

They have exactly all the same features of a standard pinch valve, with the sleeve being the wetted part only, and the wear component that can be replaced.

These valves are fully fabricated with Carbon Steel bodies, and 316 Stainless steel Tie rods and fittings.

These can be manufactured to various pressure ratings because they are all custom built, and can come with any configuration of full bore, reduced sleeve orifice, double wall, conical etc...for pre calculated flow parameters.

All standard actuation like Pneumatic, Electric, Hydraulic etc, can be used to operate these valves, and come in all standard flange drilling patterns. (ANSI#125/150, AS2129 Table D/E/H etc)

Contact our sales team to discuss your application.

PINCH VALVE REPLACEMENT SLEEVES

RHINOFLEXTM

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

RHINOFLEX MANUFACTURES PINCH VALVE REPLACEMENT SLEEVES FOR ALL BRANDS AND MODELS

These are hand built sleeves, with various layers of special rubber, with polyester, wire mesh, or Kevlar reinforcement. These will close 100% bubble tight even on solids. RHINOFLEX replacement sleeves will outlast the original sleeves because of the highest quality materials, and the expert construction of manufacture. With a wide range of elastomers, RHINOFLEX can manufacture sleeves to 50 Bar and temperatures of 130 Degree Centigrade. A variety of end configurations are available to suit most designs. These are self- cleaning and will flake and wash off any scaling that builds up during operation.

PINCH VALVE REPLACEMENT SLEEVES

RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

SLEEVE TYPES AVAILABLE

RHINOFLEX Pinch Valve Replacement Sleeves can be supplied with a variety of END STYLES and TRIM selections, pressure and temperature ratings, vacuum sleeves for throttling and control applications. Positive Opening Tags (POT) and are available for mechanical pinch valves to assist opening of valves closed for long periods or in control and low pressure applications.

Standard Sleeve:

Rhinoflex's standard sleeve is designed to allow a full port, uninterrupted process flow. Available in a wide variety of elastomers, the standard sleeve delivers durable, reliable performance.

Double Wall Sleeve:

Designed for heavy duty service, the double wall sleeve has an elastomer layer that is much thicker than **Rhinoflex's** standard replacement sleeve.

Funnel Sleeve:

The funnel sleeve is mainly used in conjunction with the pinch valve for control situations. The extra thick layer of elastomer on the downstream side increases the sleeve's service time.

Reduced Port Sleeve:

Reduced port sleeves are used in control applications where material flow needs to be slowed down as it passes through the valve. These sleeves also make

PU =POLYU POLYURETHANE				SD= SPECIAL DRILLING	SM= SLIP ON SMOOTH BORE	

PINCH VALVE REPLACEMENT SLEEVES

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

SLEEVE ELASTOMER SELECTION

Pure Gum Rubber(PGR): Ideal for abrasive applications

Pure Gum Rubber(PGR) lined with Polyurethane(PU): For extreme abrasion

Styrene Butadiene Rubber(SBR): For Dry abrasive material / Jagged Pellets

Chloroprene Rubber/Neoprene(CR): For moderate chemicals/Weather resistant

Buna -N/Nitrile(NBR): For Hydrocarbons/oils/fats/greases/chemicals/Solvents

Chlorosulfonated Rubber/Hypalon(CSM): Excellent Ozone resistant/Acids

ChlorobutylRubber(CIIR): Excellent for Hot water/ General Purpose

Ethylene Propylene Rubber(EPDM): Organic fats, chemicals/Heat resistance

Fluorocarbon Rubber: Best for strong chemicals and high temperatures.

RHINOFLEX Pinch Valve Replacement Sleeves are available for ALL POPULAR BRANDS of Pinch Valves, in the same sizes, dimensions and Face to Face configurations. These are available to suit ALL models, and pressure ratings. Our hand built technology allows us to build to any custom design and specification, with a focus on very high quality, competitive pricing, and quick delivery.

REPLACE YOUR EXISTING SLEEVE AND GET GREATER SAVINGS AND WEAR LIFE

ACTUATOR AND INSTRUMENT OPTIONS

RHINO FLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

ACTUATOR OPTIONS

Hand Wheel/ Rising-None-Rising Stem
Hand Wheel Bevel Gear/ Chain Drive
Extended Hand Wheel
Double Acting Pneumatic Actuator
Double Acting Pneumatic Actuator with Manual Over-ride
Single Acting Pneumatic Actuator (Fail open/close) Up to 40KN
Single Acting Pneumatic Actuator (Fail open/close) with Manual Over-ride
Double Acting Pneumatic Actuator with Positioner/ Position Indicator
Electric / Hydraulic Actuators

INSTRUMENT OPTIONS

Switch Box Enclosures (all IP Ratings)
Position Indicators
Electropneumatic Positioners (SMART)
Limit Switches (Mechanical / Sensor)

VALVE ORDERING CODES

RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

EXAMPLE CODE: **RFOFPGR100-HW-6-E-CS-OT**

This code will refer to the following valve selection : Rhinoflex Open Frame body, Pure Gum Rubber Sleeve, 100mm size, Hand-Wheel operated, 6 Bar, AS2129 Table flange drilling, carbon steel Body material, opening tags.
