

# SERIES -XL

## LARGE DIAMETER PINCH VALVES

# RHINOFLEX™

MANUFACTURED IN INDIA SINCE 2004 FOR SEVERE SERVICE SLURRY

Rhinoflex Series-XL Large diameter pinch valves are offered in both Open Frame and Enclosed body models. These are available from 300mm/12- inch to 1000mm /40-inch nominal bore size range.

They have exactly all the same features of a standard pinch valve, with the sleeve being the wetted part only, and the wear component that can be replaced.

These valves are fully fabricated with Carbon Steel bodies, and 316 Stainless steel Tie rods and fittings.

These can be manufactured to various pressure ratings because they are all custom built, and can come with any configuration of full bore, reduced sleeve orifice, double wall, conical etc...for pre calculated flow parameters.

All standard actuation like Pneumatic, Electric, Hydraulic etc, can be used to operate these valves, and come in all standard flange drilling patterns. (ANSI#125/150, AS2129 Table D/E/H etc)

Contact our sales team to discuss your application.
